TA12. U6. Artificial Intelligence. Writing 1

Choose the letter A, B, C, or D to indicate the correct arrangement of the sentences to make a meaningful paragraph in each of the following questions.

1.

a. AI has been integrated into healthcare to improve diagnosis and treatment planning.
b. Moreover, AI systems are capable of analyzing patient data with remarkable accuracy.
c. As a result, healthcare professionals can make faster and more informed decisions.
d. One of the most significant advancements in Artificial Intelligence is its application in the healthcare sector.
e. These technologies also assist in monitoring patient progress and predicting potential health risks.

A. d – a – b – e – c B. a – d – c – b – e C. d – b – a – c – e D. a – b – e – d – c

2.

a. AI-powered robots are designed to assist in manufacturing industries.
b. These robots are capable of performing repetitive tasks with great precision.
c. This reduces the need for human intervention in labor-intensive processes.
d. As a result, industries can achieve higher efficiency and lower operational costs.
e. In addition, they can work in hazardous environments, ensuring worker safety.

A. a – b – c – d – e B. b – a – e – c – d C. a – e – b – d – c D. a – b – e – c – d

3.

a. AI has revolutionized the way students learn and interact with educational content.
b. For example, platforms use algorithms to tailor lessons to meet individual learning needs.
c. Additionally, students can receive instant feedback on their progress, allowing them to improve quickly.
d. As a result, education has become more accessible and efficient for learners worldwide.
e. Moreover, AI creates interactive and engaging learning environments.

A. a – e – b – c – d B. a – c – b – e – d C. a – b – c – e – d D. e – a – c – b – d

4.

a. AI systems like facial recognition have improved security measures significantly.
b. These systems are used in airports, banks, and even personal devices to verify identity.
c. However, critics argue that this technology raises privacy concerns.
d. Despite its benefits, there are ongoing debates about ethical implications.
e. As such, it is essential to balance innovation with regulation.

A. a – b – c – d – e B. b – a – c – d – e C. a – c – b – e – d D. d – a – e – b – c

5.

a. AI has the potential to transform the transportation industry.
b. Self-driving cars are a prime example of this transformation.
c. These vehicles use sensors and AI algorithms to navigate roads safely.
d. However, challenges like regulatory approval and ethical dilemmas remain.
e. Nevertheless, experts believe that autonomous vehicles will become mainstream in the near future.

A. a – b – c – e – d B. b – a – e – c – d C. a – c – b – e – d D. a – b – c – d – e

6.

a. The use of AI in business decision-making has increased exponentially.
b. Companies rely on AI to predict market trends and consumer behavior.
c. As a result, businesses can adapt their strategies to remain competitive.
d. Additionally, AI can optimize supply chain management and improve customer service.
e. Therefore, AI is now considered a critical tool for modern enterprises.
A. a – b – c – d – e B. b – a – e – c – d C. a – e – b – c – d D. a – b – d – c – e

7.

a. One of the most discussed applications of AI is virtual assistants like Alexa and Siri.
b. These assistants can perform tasks such as setting reminders, playing music, and answering questions.
c. They have become integral parts of smart homes and workplaces.
d. However, concerns about data security and privacy persist.
e. To address these issues, developers are working on creating more secure systems.
A. a – b – c – d – e B. a – c – b – e – d C. b – a – e – c – d D. a – b – e – c – d

8.

a. AI has changed the way we shop online.
b. For example, e-commerce platforms use algorithms to recommend products based on browsing history.
c. This increases the likelihood of customers making a purchase.
d. Additionally, AI-powered chatbots provide instant assistance, improving the shopping experience.
e. As a result, businesses have seen a significant rise in customer satisfaction and sales.
A. a – b – c – d – e B. b – a – e – c – d C. a – d – b – c – e D. a – b – d – c – e

9.

a. The development of AI raises ethical and moral questions.
b. For instance, who should be held accountable if an autonomous vehicle causes an accident?
c. Additionally, there are concerns about AI bias in hiring practices.
d. Critics argue that such issues need to be addressed before AI can be widely adopted.
e. Therefore, policymakers and developers must work together to create ethical guidelines.
A. a – b – c – d – e B. b – a – e – c – d C. a – c – b – d – e D. a – b – e – d – c

10.

a. AI is being used to combat climate change.
b. For example, algorithms can monitor deforestation and predict weather patterns.
c. These tools help governments and organizations take proactive measures.
d. Additionally, AI-powered systems optimize energy usage in homes and industries.
e. As a result, AI plays a crucial role in creating sustainable solutions.
A. a – b – c – d – e B. b – a – e – c – d C. a – b – d – c – e D. a – c – b – e – d
