## Part C: Time on the Computer

This table shows how much time students from two different schools spend doing different activities on the computer.

**Average Time Spent Each Day on Computer Activities**

| Computer Activities | Ford Middle School | Grant Middle School |
|---|---|---|
| Playing video games | 40 minutes | 20 minutes |
| Reading online newspapers or magazines | 10 minutes | 35 minutes |
| Working on schoolwork | 60 minutes | 60 minutes |
| Total | 110 minutes | 115 minutes |

## Now it's your turn to write!

**A** Answer these questions.

1. How much time do students from Ford spend playing video games? 40 minutes
2. How much time do students from Grant spend playing video games? _____
3. At which school do students spend 10 minutes reading online? _____
4. At which school do students spend 35 minutes reading online? _____
5. Which activity do the students spend the most time doing? _____

**B** Compare how much time students from Ford and Grant spend on each computer activity. Write 3 to 5 sentences about how the students' time on each activity is similar and different. Use information from the table to help you.
