$$\text{Trinomio } x^2+bx+c \quad x^2 + bx + c = (x + m)(x + n)$$

Selecciona la factorización correcta del trinomio

$x^2 + 7x + 12 =$	$(x + 3)(x + 4)$ 	$(x + 2)(x + 6)$ 	$(x - 2)(x - 5)$ 
$x^2 + x - 12 =$	$(x + 3)(x - 4)$ 	$(x + 4)(x - 3)$ 	$(x + 2)(x - 6)$ 
$x^2 - 2x - 24 =$	$(x - 6)(x + 4)$ 	$(x - 12)(x + 2)$ 	$(x - 4)(x + 6)$ 
$x^2 + 5x - 24 =$	$(x + 8)(x - 3)$ 	$(x - 3)(x - 8)$ 	$(x - 4)(x + 6)$ 
$x^2 + 5x + 4 =$	$(x + 5)(x + 1)$ 	$(x - 5)(x + 1)$ 	$(x + 4)(x + 1)$
