FAQs • General Technical FAQ

What if my file isn't printing correctly?

Sometimes a PDF will look fine on your screen, but may not print out correctly (especially if the file is graphic-heavy).

Try this:

1. Open the file in Adobe Reader.
2. Click "Print" within the Adobe Reader application.
3. You can select "adjust to fit" if necessary.
4. Click "advanced."
5. Check the "print as image" box.

IMPORTANT: Before you print, follow the PDF printing instructions from TpT (on right). "Print As Image" and "Actual Size" will ensure proper printing and positioning of the file. (Alternately: Make sure "Page Scaling" is set to "None.")
