LIVEWORKSHEETS

Identify the types of emergencies described in the following texts

1.Heading: .....

On November 23, 2007, the Explorer, operating in the Antarctic, struck ice. Water started creeping in through a fist-sized hole punched into the ship's starboard. As it flooded the engine room, the power failed. The ship ceased responding. The ship was evacuated. The captain and chief officer stayed to operate the bilge pumps. After hours of listing, the ship went down. The 2,400-ton vessel was carrying 100 tourists in addition to a crew of 50 but no injuries were reported.

2.Heading: .....

(May 25, 2010) An oil tanker and a bulk carrier collided in waters between Malaysia and Singapore, spilling an estimated 2,500 tons of oil. The incident happened in the Traffic Separation Scheme (TSS) of the Singapore Strait but traffic in Asia's busiest shipping lane was not affected.
