

## Activity 14

Test your smart home system. Does it meet the basic requirements? If your system doesn't meet requirements, go back, and try to fix it. Then, write your results.

Test	Result	
Does the program input a value from the built-in ambient light sensor?	No <input type="checkbox"/>	Yes <input type="checkbox"/>
Does the program input a value from the built-in temperature sensor?	No <input type="checkbox"/>	Yes <input type="checkbox"/>
Does the program output a light value on the LED grid?	No <input type="checkbox"/>	Yes <input type="checkbox"/>
Does the program output a temperature value on the LED grid?	No <input type="checkbox"/>	Yes <input type="checkbox"/>
Does the program satisfy the following? <ul style="list-style-type: none"><li>◉ If the light value is <math>&lt; 200</math>, then<ul style="list-style-type: none"><li>◈ output "Dark" on the LED grid.</li></ul></li><li>◉ If the temperature value is <math>&gt; 25</math>, then<ul style="list-style-type: none"><li>◈ output "Hot" on the LED grid.</li></ul></li></ul>	No <input type="checkbox"/>	Yes <input type="checkbox"/>

Did you answer No to any questions? If so, can you change your program to improve your test score?

Explain any changes that you made to your program.
