

Area and Perimeter

Shapes with same area

1a. Circle the shapes with an area of 12cm^2.	1b. Circle the shapes with an area of 14cm^2.
A.	A.
B.	B.
C.	C.
D.	D.
★ = 1cm^2 VF	★ = 1cm^2 VF

4a. All of these rectangles have an area of 24cm^2.	4b. All of these rectangles have an area of 18cm^2.
A.	A.
B.	B.
C.	C.
★ Complete the missing lengths. not to scale VF	★ Complete the missing lengths. not to scale VF

2. Match these shapes to their area.

A.

B.

C.

24cm^2

21cm^2

★ not to scale VF HW/Ext

1. Circle the area of the shape below.

2. Use the formula *Area = length x width* to calculate the area of the compound shape below.

Total area = _____ cm²

VF
