

## ACTIVITY CARD 1

Directions: Study the parallelograms below and match the conditions that guarantee that the figure is a parallelogram.

### FIGURES

1.)

2.)

3.)

4.)

5.)

In the figure  $\triangle ABD \cong \triangle DCA$

6.)

### CONDITIONS

1. A quadrilateral is a parallelogram if both pairs of opposite sides are congruent.

2. A quadrilateral is a parallelogram if both pairs of opposite angles are congruent.

3. A quadrilateral is a parallelogram if both pairs of consecutive angles are supplementary.

4. A quadrilateral is a parallelogram if the diagonals bisect each other.

5. A quadrilateral is a parallelogram if each diagonal divides the parallelogram into two congruent triangles.

6. A quadrilateral is a parallelogram if one pair of opposite sides are both congruent and parallel.
