Task 3. Read the text and choose the correct variant

My birthday is on 8th March. International Women's Day is also celebrated on that day, so it's a double holiday for me. I usually host a party, and many of my friends and relatives are invited to it. That is why I get a lot of presents. It is preferred by some to celebrate their birthdays at home. Personally, I'm not a fan of this idea because you have to prepare and then clean everything yourself. So, I always celebrate my birthday at a cafe. Everything is done for me: the food is cooked, the decorations are hung and the music is played. All I have to do is have fun with my favourite people. I am sometimes asked why I like my birthday so much. Well, presents and surprises are great, but this day is the perfect chance for me to meet up and hang out with everyone, including those people that I don't see very often. That is why I love my birthday.

Angela

1. Angela's birthday is on ...
