

Calcula la fracción irreducible.

$$\frac{18}{12} = \frac{\square}{\square}$$

$$\frac{49}{14} = \frac{\square}{\square}$$

$$\frac{25}{35} = \frac{\square}{\square}$$

$$\frac{42}{21} = \frac{\square}{\square}$$

$$\frac{21}{28} = \frac{\square}{\square}$$

$$\frac{31}{17} = \frac{\square}{\square}$$

$$\frac{100}{75} = \frac{\square}{\square}$$

$$\frac{30}{32} = \frac{\square}{\square}$$

$$\frac{8}{72} = \frac{\square}{\square}$$

$$\frac{35}{36} = \frac{\square}{\square}$$

Convierte estas fracciones impropias en suma de un número entero y una fracción propia.

$$\frac{12}{5} =$$

$$\frac{59}{3} =$$

$$\frac{9}{8} =$$

$$\frac{23}{2} =$$

$$\frac{20}{3} =$$

$$\frac{17}{9} =$$
