

I Will Study at Junior High School Next Year

Next year, I will study at junior high school, and I feel very excited about it. I will wake up early every morning to get ready for school. In the first week, I will meet my new teachers and classmates. During the day, I will join different classes, like science, math, and English. I will also have fun learning new things that I didn't study in elementary school. After school, I will stay for a while to join the sports club because I want to make new friends and stay active.

On weekends, I will spend some time doing my homework. I will also prepare for tests because I want to do well in my studies. Every afternoon, I will help my younger sibling with their homework, just like my older brother helped me before. At the end of the year, I will take my final exams and do my best. I hope I will enjoy my time in junior high school, and I will learn a lot of useful things for the future!

Drag and drop each sentence to each question!

1. When will the writer start studying at junior high school?

2. What will the writer do every morning before school?

3. Who will the writer meet during the first week of junior high school?

4. What subjects will the writer join in junior high school?
