Reading

7 Read the article about a science competition. Six sentences have been removed from the article. Choose the best answers (A–F) to complete the article.

Do you love science? (1) Here at the Science Institute we recognise the importance of people like you to the future of technology and every year we hold a nationwide competition to discover young inventors of the future; people who will shape our future lives. It doesn't matter whether you're 11 or 18. There will be prizes for a range of different categories, depending on the type of invention and the age of the entrants, but the main prize will be for the best invention by a team of young scientists on a particular theme.

(2) Last year, it was 'Clothes of the Future', and the winners were a team from Blackhill Secondary School who came up with a new thermal material that would retain heat, even in the coldest temperatures. This year's theme is 'Transport'. (3) You might have an idea for a labour-saving device to use in an existing means of transport – in cars, on a bike, on a plane, etc. Alternatively, you may think of a completely new way of getting around altogether. Now, that would be interesting, wouldn't it? Whether your invention is big or small, we want to hear about it.

The first thing to do is to form a team at your school and discuss your ideas with your teacher. (4) The ideas must be your own. Then, hand in your ideas in writing, showing the processes you went through and your reasons for developing this particular project. We need to receive your idea before the 2nd April. All entries will be examined by a team of experts and the best one will be chosen by the end of June. (5) The winners will be invited to a prize-giving ceremony at the Ritz Hotel in London on the 15th August.

The first prize is an amazing opportunity for the winning team to travel around the United States using every possible form of transport in existence! Last year's winners spent a month on a station in the Arctic to see for themselves how their special gloves worked in such freezing temperatures. 'It was the chance of a lifetime,' said Pam Parker, one of the lucky team. 'We had a wonderful time and I've come back with so many ideas. (6) You never know what you can achieve until you try!' So, start thinking, and we look forward to receiving your entries. For more details, go to our website.

- A In particular, do you love inventing new things and ways of doing things?
- B You will be informed of the results in early July.
- C Every year the theme changes.
- D Remember that the teacher will be there to give you guidance, not to help with ideas.

- E I'd recommend entering this competition to everyone.
- F You can interpret the theme in many ways.

/ 6

8 Read the article again. Are these statements True (T) or False (F)?

1 The competition is to find new inventions to sell.	T/F	5 Teachers should not be involved with the project at all.	T/F
2 The theme for the main prize remains the same for two years and then changes.	T/F	6 The winners will spend some time in the Arctic with scientists.	T/F
3 Individual entries cannot win the main prize.	T/F		/ 6
4 Last year, students had to design a piece of designer clothing.	T/F

Writing

12 Read this notice from your school magazine and write your article.

Write an article with this title for the school magazine – all articles will be published in next month's issue!
Schools should allow students to use tablets/mobile devices in exams.

Include information about these things in your article:

- things that you can use a mobile device for in an exam
- reasons why this can help you academically in an exam
- reasons why schools may be against using mobile devices in exams

Write 150–180 words.

/ 10

Speaking

13 Your teacher has asked you to give a presentation with the title below. Use the ideas in the box to help you make brief notes before you begin.

Mobile phones should be banned from schools.

- what students use mobile phones for at school
- why they can be disruptive to school life
- suggestions for sensible ruling about use of phones for students at school
