dangerous experience interesting part time physical **skilled** training

My job is very ¹ skilled – you have to study for about four years to get the full qualification. You also have to work at the same time to get practical ² experience. It's important to get the right ³ training, because you are working with something very ⁴ dangerous – it can kill you! I can choose the hours I work and at the moment I'm only working ⁵ part time because I'm also doing some teaching at the college. The job is quite ⁶ physical – you spend a lot of hours on your feet and you need strong arms. With new kinds of renewable energy, it's going to be ⁷ interesting to see how the job will change in the future.

boring challenging essential long on my own tiring well paid

For my job, I have to work very ⁸ long hours and sometimes weekends too, so it can be ⁹ tiring, but it's never ¹⁰ boring – something different happens every day! I sometimes work as part of a team, but I also spend a lot of time working ¹¹ on my own. I do my job anywhere really – it can be in the street, at a café or on a train. I meet a lot of important people, but sometimes the work is ¹² challenging because people don't always want to talk to you and you don't have much time to get your story! In my job it's ¹³ essential to be able to write well and to try to tell the truth. It's not great for family life because I'm so busy and it's not very ¹⁴ well paid (but of course the money is better than in many jobs).
