

PHOTOSYNTHESIS

Look at the picture. Write in the boxes what the plant takes and expels during the photosynthesis process. Match with the correct part of the plant.

PHOTOSYNTHESIS is a process in which plants need **WATER, MINERALS, CARBON DIOXIDE**, and **LIGHT** and **ENERGY** from the sun to make their own **FOOD** and **OXYGEN**. It only happens during the **day**.

_____ + _____ + _____ + _____ = _____ + _____

SUNLIGHT = Energy and light from the sun.
