c. Russia is known as one of the biggest _____in the world. (COUNTRYSIDE)

d. We should use more _____ products to reduce pollution. (RECYCLE)

III. READING (3MS)

1 Read the text about past explanations for UFOs. Choose True, False.

An unidentified flying object, or UFO, is anything in the sky that the person who sees it cannot explain. Some people believe UFOs are alien spacecraft. However, most scientists believe that it can be easier to explain UFOs. A UFO has different descriptions. It can take the form of a disk, triangle or even an egg. After a sighting of a disk-shaped UFO in the 1940s, the term "flying saucer" became popular. It soon became fashionable to call all UFOs flying saucers. Nowadays, there are records of thousands of UFO sightings. These are photographs of UFOs and conversations with the people who saw UFOs. In the 1950s, a government asked a group of scientists to study hundreds of sightings. However, most sightings were just space objects like stars, planets or meteors. A lot of other sightings were only aircraft, birds or hot gases. However, such things didn't stop people from reporting UFOs. By the mid-1960s, there were even more sightings of UFOs than ever. People also found that most UFO or alien sightings happened in bad weather. But governments around the world still believed that UFOs were unreal. Other scientists agreed. But it was hard to explain why UFOs still appeared. Nowadays, researchers believe that UFOs might be visitors from space.

LIVEWORKSHEETS

Answers	True	False
1. It is easy for a person to describe a UFO when he or she sees it.	○	○
2. Most researchers believe that explaining UFOs will be easier.	○	○
3. A UFO can be a disk-shaped or egg-shaped object.	○	○
