

Dividing by 5

To recall and use division facts for the 5 times table.

Toppings for an ice cream sundae cost **5p** each.

Look at how much each child spent and work out how many toppings they bought for their sundae. Fill in the number lines and calculations.

Sarah spent 30p.

$$30 \div 5 = \boxed{\quad} \text{ toppings}$$

Malik spent 10p.

$$10 \div 5 = \boxed{\quad} \text{ toppings}$$

Abbas spent 5p.

$$45 \div 5 = \boxed{9} \text{ toppings}$$
