	We dig a hole.
	We pull out the weeds that grow around the plant.
	We put the flowerpot near a sunny place.
	We water it regularly.

LIVEWORKSHEETS

Butterfly Life Cycle

Section 6. ***Read the passage below and answer the questions on the next page. 11 marks***

Butterflies are fascinating insects that go through a life cycle consisting of **four stages.** Each stage plays an essential role in the transformation from a tiny egg to a beautiful butterfly.

Egg Stage

The life cycle of a butterfly begins with the female butterfly laying eggs. The eggs are tiny, and their color and shape vary depending on the species of the butterfly. The eggs are usually laid on leaves, where they will be safe and have easy access to food.

After a few days, the egg hatches into a caterpillar. At this stage, the caterpillar is very small but grows quickly by eating leaves. The caterpillar sheds its skin several times, a process known as molting. The caterpillar will continue to eat and grow until it's fully grown.

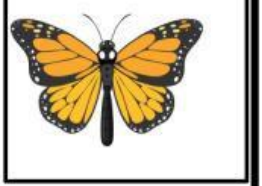

Caterpillar Stage

Chrysalis Stage

After a few weeks of eating, the caterpillar will turn into a chrysalis. The chrysalis is a protective shell that the caterpillar makes around itself. Inside, the caterpillar will change its body completely into that of a butterfly. This process takes a few weeks.

Finally, the butterfly will emerge from the chrysalis. At first, its wings will be wet and crumpled. The butterfly will pump blood into its wings to make them strong and straight. When ready to fly, the adult butterfly will search for food and a mate to start a new cycle.

LIVEWORKSHEETS

1. What is the first stage of the butterfly' s life cycle?

_____

_____

2. How does the caterpillar grow during the caterpillar stage?

_____

_____

3. What is a chrysalis?

_____

_____

4. How does the butterfly make its wings strong and straight?

_____

_____

LIVEWORKSHEETS

Section 7: Match the words with the definitions.

Crouch **Strolled** **Scrawny** **Chimpanzees** **Pitiful**

_____: Very thin; skinny.

_____: Walked in a slow, relaxed way.

_____: To lower the body close to the ground by bending the legs.

_____: Causing pity or sympathy.

Section 8: Suffixes -ful, -less, -ly. Select the words that are spelled correctly.

Ⓐ sleeplass
Ⓑ sleapless
Ⓒ sleepless
Ⓓ sleepliss

Ⓔ carefulli
Ⓕ carefuly
Ⓖ carefully
Ⓗ carefilly

Ⓐ helpfil
Ⓑ helpfol
Ⓒ helpful
Ⓓ helpfull

Ⓔ helpless
Ⓕ helpliss
Ⓖ helplass
Ⓗ helplest

Ⓐ helplessli
Ⓑ helplissly
Ⓒ helplesslly
Ⓓ helplessly

Ⓔ colorfil
Ⓕ colorfol
Ⓖ colorfull
Ⓗ colorful

LIVEWORKSHEETS
