

UNIT 4: Sound and light.

Read your mind map and complete:

Light is a form of energy. light comes from
sources in nature, like the .

light comes from machines people make,
like lamps.

We can save energy if we use energy-efficient light bulb and we
 off lights when we do not use them.

Read your mind map and complete:

You can see through [] materials well because all light can pass through them.

Only some light can pass through [] materials.

You cannot see through [] materials because they completely block the light.
