Marks ____ / 10

Test 8

- 4 Complete the text about the weather in the British Isles. Use words from the box. Do not use all the words. Look at the example.

sunny	rainy	windy	mountains	deserts	clouds
valleys	rain	wind	fog	largest	igloo

The British Isles are a small group of islands in the North Sea. They are close to mainland Europe. The two largest* islands are Ireland and Britain. The position of the British Isles, on the eastern side of the Atlantic Ocean, is very important for the weather in Ireland and Britain. Cold¹ blows across the Atlantic and brings a lot of² and rain to the British Isles.

Ireland is famous as a 'green' island because the weather is often³. There aren't any tall⁴ in Ireland, so the land is green with grass. There are tall mountains and beautiful⁵ in Wales, the north of England and in Scotland. When the Atlantic clouds hit these mountains, they drop their⁶ across Britain.

The year is divided into four seasons: Spring, Summer, Autumn and Winter. The weather changes through the year. Spring is usually rainy and⁷. Summer is often warm and⁸. In Autumn, the weather becomes colder. In Winter, it usually snows in Scotland, in the north of England and in Wales. Sometimes the weather is foggy.⁹ is very dangerous because it is difficult to see far away.

The weather in the British Isles, is never very hot or very cold. There are no jungles or¹⁰ or rainforests in the British Isles. This is because of the Gulf Stream, a stream of warm water which comes across the Atlantic Ocean from the Mexican Gulf. The people of the British Isles have to say a big 'thank you' to Mexico.
