

## 1) Pick up the correct summary

- 1 In the video, it is stated that the first people in North America arrived from Europe around 30,000 years ago. They are described as having a uniform way of life, primarily focused on agriculture rather than hunting or fishing. The Europeans are portrayed as friendly settlers who helped the Native Americans thrive. Currently, there are fewer than 300 tribes in the United States, and they are mostly focused on modernising their cultures.
- 2 In the video, the focus is on the impact of climate change on the traditional lifestyles of Native Americans. It highlights how changing weather patterns have affected their hunting and fishing practices, leading to new ways of adapting to the environment. The video also features interviews with tribal leaders discussing innovative methods to preserve their cultural heritage amidst these changes. Ultimately, it concludes with a message of hope, suggesting that collaboration with scientists can help restore balance to their ecosystems.
- 3 The video discusses the arrival of the first people in North America, believed to be from Asia around 30,000 years ago. It explains how these early inhabitants became diverse groups with unique languages and lifestyles, such as hunting buffalo or fishing. The arrival of Europeans in the 1500s brought diseases that greatly reduced the Native American population and led to conflicts over land. Today, there are over 550 recognised tribes in the United States, and many are working to preserve their cultures, languages, and improve living conditions on reservations.

## 2) True or False

- 1 The first people in North America came from Europe.
- 2 Native Americans lived in different ways depending on their environment.
- 3 The Canadian government supported the potlatch ceremony in the past.
- 4 There are many Native American tribes in the United States today.
- 5 The first white people arrived in North America in the 1800s.
