LIVEWORKSHEETS

Using Easy Trade Panel Expert in an Uptrend

In the 1-hour chart of the **EUR/USD** pair, the Easy Trade Panel Expert offers two distinct sections to enable complete trade management for traders.

The first section includes a panel for executing trades, managing volume and capital, and controlling **risk and reward**, while the second section is dedicated to managing open positions.

In the chart below, a **buy trade** has been executed, and using the right panel, the entry volume and risk level can be set.

Additionally, the **position management box** enables the use of tools like **Risk-Free (BreakEven)**, **Trailing Stop**, and **Partial Close** to manage trades.

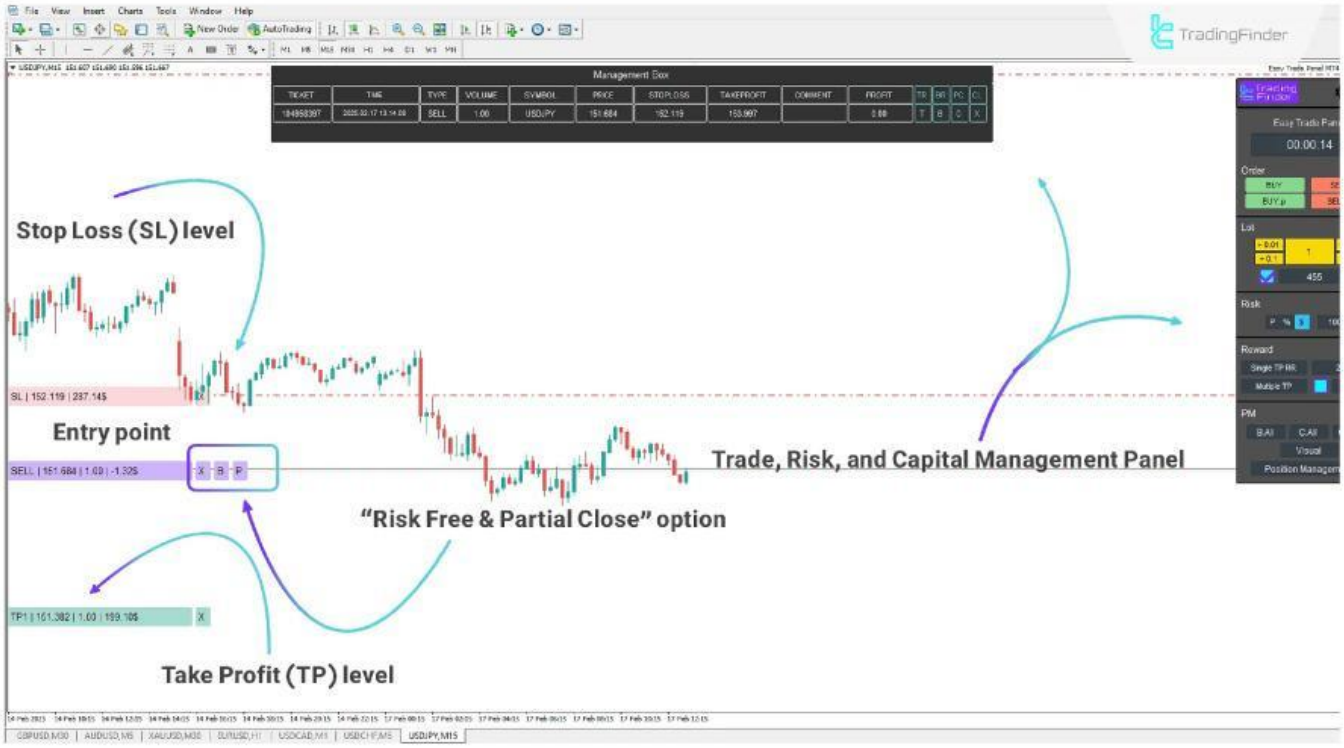

Manage Buy Trade with Easy Trade Expert

Using Easy Trade Panel Expert in a Downtrend

In the 15-minute chart of the USD/JPY pair, a **sell trade** has been opened. By using the Easy Trade Panel Expert, multiple **take-profit** levels (Multiple TP) can be set, and the **visual risk-to-reward** feature can be used to analyze the **risk-to-reward ratio**.

Conclusion

The **Easy Trade Panel Expert** is one of the **Trading Tools in TradingFinder**, consisting of two separate panels.

The first panel is for managing trades, controlling entry **volume**, and setting risk parameters, while the second panel is for managing executed positions on the chart.

With features such as setting multiple stop losses and **risk-free** trades, this tool can be used to reduce risk.
