Price Action Indicators for MT4

The **Accumulation, Distribution, and Manipulation (AMD)** indicator in MetaTrader 4 is one of the **liquidity indicators** for trend analysis. This indicator analyzes volume and price within specific sessions, dividing price action into three stages: **Accumulation, Manipulation, and Distribution.**

The indicator displays the **accumulation** stage in pink, **distribution** in blue, and **manipulation** in green. The **"AMD"** indicator can effectively identify potential price reversal points.

| Market | Cryptocurrency - Forex - Stocks - Commodities |

AMD Indicator at a Glance

The **"AMD"** indicator enables traders to focus on specific parts of the trading day by identifying and analyzing market behavior across different **sessions**. The **Accumulation** phase represents buyer entry and asset accumulation, with buying pressure outweighing selling pressure.

The **Distribution** phase indicates increased selling pressure and asset distribution. Naturally, the **Manipulation** phase reflects the shift from accumulation to distribution.

AMD Indicator in an Uptrend

According to the **USD/CAD** price chart in a 15-minute timeframe, a trend **reversal** favoring price growth is observable. The **accumulation** and **distribution zones** highlight the **strength** of a trend.

Entry and exit points for trades can be identified by **observing** trend weaknesses in these zones, which often precede significant movements.

AMD Indicator Performance in an Uptrend

AMD Indicator in a Downtrend

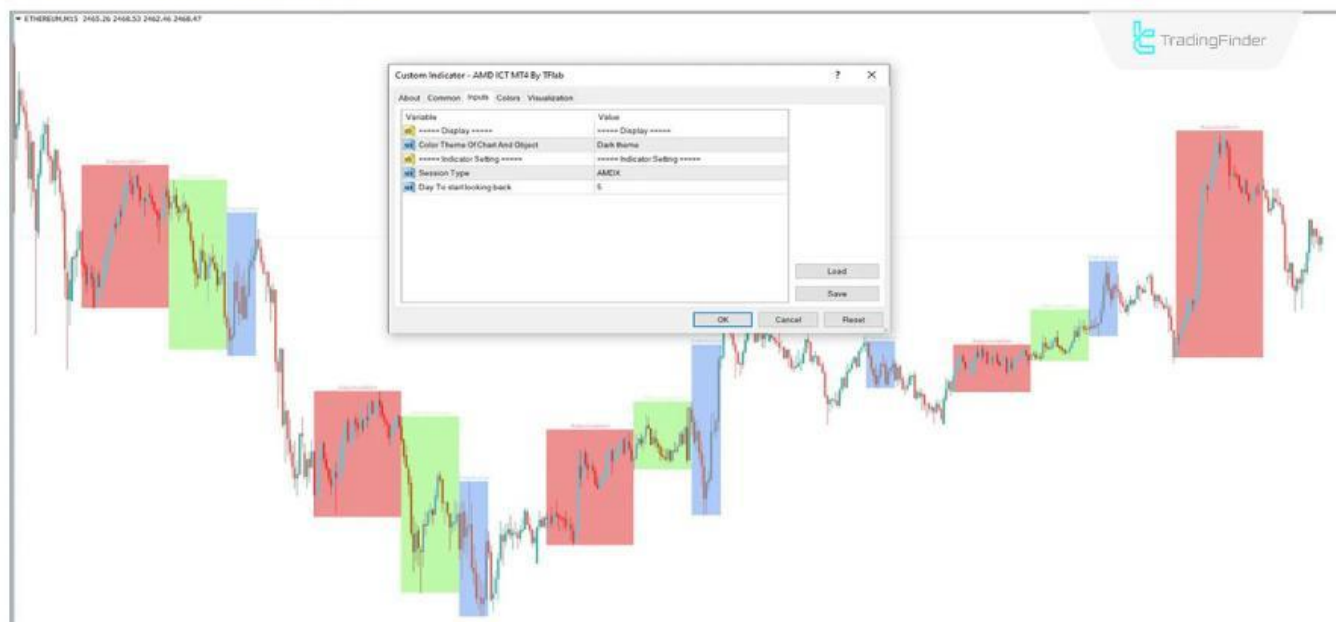

According to the **NZD/USD** chart on a 1-hour timeframe, weaknesses in the **distribution** and **accumulation** zones are visible. These weaknesses suggest a trend change after the **distribution** phase concludes.

Consequently, traders can identify appropriate **short trade positions**. The "AMD" indicator zones are defined based on **session** highs and lows.

AMD Indicator Functionality in Confirming a Downtrend

Indicator Settings

AMD ICT Indicator Settings

- ⚡ **Theme:** Indicator Theme;
- ⚡ **Session Type:** AMDX Session Type;
- ⚡ **Day to Start Looking Back:** Desired number of days: 5.

Conclusion

The **(AMD ICT) indicator** is one of the **ICT indicators** and determines the **highs** and **lows** of each trading session within the desired trading sessions. The indicator establishes **accumulation**, **manipulation**, and **distribution** zones by connecting these **points**.

By evaluating the strengths and weaknesses of **these zones**, traders can identify trend **reversal** points and validate long and short trades.
