

FRACCIONES EQUIVALENTES E IRREDUCTIBLES

1. Colorea las fracciones y une las que sean equivalentes.

2. Indica cuáles de los siguientes pares de fracciones son equivalentes (=) o no (≠).

$\frac{2}{5} \bigcirc \frac{4}{10}$

$\frac{3}{7} \bigcirc \frac{24}{58}$

$\frac{3}{11} \bigcirc \frac{9}{44}$

$\frac{12}{20} \bigcirc \frac{3}{2}$

$\frac{5}{6} \bigcirc \frac{10}{24}$

$\frac{6}{8} \bigcirc \frac{3}{5}$

$\frac{8}{11} \bigcirc \frac{32}{44}$

$\frac{6}{7} \bigcirc \frac{18}{21}$

3. Calcula la fracción irreducible.

Nivel fácil

$$\frac{6}{2} = \underline{\quad}$$

$$\frac{10}{5} = \underline{\quad}$$

$$\frac{14}{7} = \underline{\quad}$$

Nivel intermedio

$$\frac{12}{4} = \underline{\quad}$$

$$\frac{20}{10} = \underline{\quad}$$

$$\frac{25}{15} = \underline{\quad}$$

Nivel difícil

$$\frac{120}{48} = \underline{\quad}$$

$$\frac{60}{20} = \underline{\quad}$$

$$\frac{84}{24} = \underline{\quad}$$

Nivel pro

$$\frac{420}{900} = \underline{\quad}$$

$$\frac{256}{576} = \underline{\quad}$$

$$\frac{1680}{2940} = \underline{\quad}$$
