

Dividing By Decimals – Equivalent Expressions

When we are asked to divide by a decimal we should first write an equivalent calculation with a whole number divider.

$$\frac{57.23}{0.8} = \frac{572.3}{8}$$

×10
×10

We can then find an approximate answer:

$$572.3 \div 8 \approx 560 \div 8 = 70$$

Create an Equivalent Expression and then Estimate by Rounding.
