Read the following passage about ASEAN and Its Role in International Cooperation and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions from 23 to 30.

Education has evolved dramatically in recent years, especially with the rise of digital learning. While traditional classroom settings are still common, students are now turning to online platforms for more flexible learning experiences. These platforms offer interactive lessons, virtual classrooms, and access to a vast range of educational resources. As a result, students are not limited by geography or time, making education more accessible than ever before.

One of the most significant changes is the use of gamification in education. Many online courses incorporate games and challenges to keep students motivated and engaged. This approach has proven to be highly effective, as it makes learning more fun and rewarding. For example, language-learning apps reward students with points for completing exercises and reaching milestones, encouraging them to keep going.

However, despite the benefits, some students still find it difficult to **adapt** to these new methods of learning. Many miss the face-to-face interaction and structure provided by traditional schools. **They** may also struggle with time management when learning independently. To address these issues, some schools offer blended learning models, which combine online lessons with in-person sessions, helping students transition **smoothly**.

Fortunately, technology is helping bridge these gaps. Virtual reality (VR) and augmented reality (AR) are increasingly being used to create immersive learning environments. With these technologies, students can explore complex subjects like history and science in a hands-on, interactive way. **The future of education seems to be a blend of technology and traditional teaching methods, offering the best of both worlds.**

Read the following passage about ASEAN and mark the letter A, B, C or D on your answer sheet to indicate the best answer to each of the following questions from 31 to 40.

[I] In today's world, students are increasingly taking innovative approaches to learning English. [II] While conventional methods like attending classes and using textbooks remain essential, many students are exploring different avenues that fit their personal preferences and lifestyles. [III] Technology, in particular, offers a wealth of resources to enhance learning. [IV]

One popular method is using mobile apps and online platforms that offer interactive lessons **tailored to** individual levels. These apps often use gamification techniques to keep students engaged while helping **them** build their vocabulary, grammar, and speaking skills. For example, Duolingo and Babbel are widely used to help learners practice daily through bite-sized lessons.

Another approach gaining popularity is watching movies and TV shows in English. Many students choose to watch their favorite films or series in the original language to improve their listening skills and learn more about cultural nuances. Subtitles can also be used to aid comprehension and **reinforce** new vocabulary.

In addition, some students take part in online conversation exchanges where they practice speaking with native speakers. These exchanges, either through video calls or messaging platforms, help students build confidence in their speaking abilities and gain familiarity with casual or colloquial expressions. As English has become a global lingua franca, students are adapting their learning strategies to be more effective and enjoyable. **By embracing new technologies and learning methods, students not only improve their language skills but also make the process more engaging and relevant to their lives.**
