

Magic spells

In Hogwarts, one subject that they have is Charms. In these lessons students learn how to cast spells using special movements and phrases, such as:

- Wingardium leviosa - this spell is cast to levitate objects, you have to swish and flick.
- Expelliarmus - this spell is cast to disarm a person, you have to move your wand to the right and down quickly.
- Incendio or Lacarnum inflamarae - this spell is cast to set fire to something, you have to move your wand in the shape of a triangle.
- Alohomora - this spell is cast to open locks, you have to make a clockwise circle with your wand and then move it downwards.
- Lumos solem - this spell is cast to produce light, you have to make a loop with your wand from left to right.
- Reparo - this spell is cast to repair an object, you have to move your wand in a clockwise spiral.
- Petrificus totalus - this spell is cast to petrify a person, you have to make a U shape with your wand and then go along in a horizontal line and flick down

Choose what spell is used in each scene and drag the correct wand movement..
