Unit 3: MUSIC

The Power of Music

Music has been a part of human culture for centuries. From traditional folk songs to modern pop hits, it has the power to bring people together and express emotions in a way that words alone cannot. Many music lovers, or fans, enjoy different genres, from classical to hip-hop, but one of the most influential styles is rock music.

Rock music became popular in the 1950s and 1960s, with loud guitars, energetic performances, and rebellious lyrics. Many singers used their music to challenge social norms, leading some people to see rock as an anti-establishment movement. Bands like The Beatles and Led Zeppelin played to massive crowds, with thousands of fans cheering as they performed on stage.

Concerts often have an electric atmosphere. Some artists use special effects like lights, fog machines, and even giant balloons to make their shows unforgettable. Outside the venues, lines of parked cars wait for excited concertgoers. Many young people, including girls and boys alike, are drawn to the energy of live music.

Despite changes in the industry, music remains a powerful force in the world. Whether it's a small acoustic performance or a massive festival with thousands of screaming fans, music has the ability to inspire, connect, and entertain.

Task 1: Decide the followings are True or False ?

Concerts use lights, fog machines, and giant balloons to create an exciting atmosphere.	T	F
Cars are mentioned in the passage as a way for musicians to travel between concerts.	T	F
Only boys enjoy live music, according to the passage.	T	F
Music remains powerful today because it continues to inspire, connect, and entertain people	T	F
The general tone of the passage towards music is negative and critical.	T	F
