READING

Clinical Case: Carlos Méndez

Carlos Méndez is 50 years old. Last week, he felt very sick. He had a cough, a high fever, and difficulty breathing. He also has asthma, so his condition was serious.

At the doctor's office, Carlos breathed heavily and had a high fever. The doctor examined him and said, 'You have pneumonia.'

The doctor prescribed antibiotics and told him to stay in bed. Carlos did not leave his house for a week. Now, he feels better, but he still needs to rest.
