

RSI Heatmap Indicator for MetaTrader4 Download - Free - [Trading Finder]

The **RSI Heatmap Indicator** is one of the technical analysis tools in **MetaTrader 4** that helps traders visualize the relative strength status of various currency pairs in the form of a heatmap. This **MetaTrader4 Currency Strength Indicator** combines the concept of the **Relative Strength Index (RSI)** with a heatmap to display trends and the strength of currencies relative to one another.

The **RSI Heatmap Indicator** generates a heatmap based on the RSI values for each asset. The different colors on the map indicate the **overbought** and **oversold** status of the assets: **green** indicates **oversold** conditions and **buying** opportunities, while **red** indicates **overbought** conditions and **selling** opportunities.

Indicator Table

Indicator Category	Signal and Forecast - Trading Tool
Platforms	MetaTrader 4
Trading Skills	Beginner
Indicator Types	Overbought and Oversold
Timeframe	M5 – M15 – M30 – H1 – H4 - Daily
Trading Style	Scalper - Day Trading - Swing Trading
Trading Instruments	Forex

Overview

The **RSI Heatmap Indicator** can help determine trend direction and suitable entry-exit points across different timeframes, reducing trading risk. Using color changes in the heatmap, traders can identify solid trends and potential reversal points in **MetaTrader4 indicator**. It also allows for the assessment of the relative strength status of assets across multiple timeframes simultaneously.

Bullish Signal Conditions of the Indicator (Bullish Setup)

The chart of the **USD/JPY** currency pair in the 5-minute timeframe is shown in the image below. In the heatmap, the timeframes (**M15-M30-H1**) have changed from dark green to green, indicating oversold conditions and the beginning of a bullish trend in the short to medium term. Therefore, one can look for a **trigger** to enter buy trades in these timeframes.

Bullish Setup Conditions of the RSI Heatmap Indicator

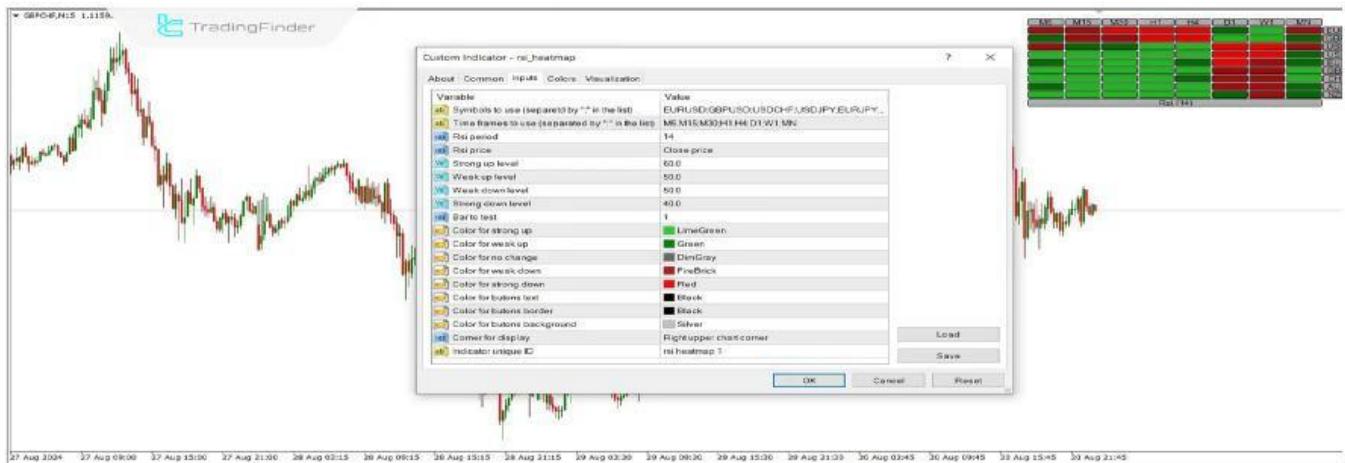

Bearish Signal Conditions of the Indicator (Bearish Setup)

The chart of the **EUR/USD** currency pair in the 4-hour timeframe is shown in the image below. In the heatmap, the timeframes (**H1-H4-D1**) have changed from red to dark red, indicating overbought conditions and the beginning of a bearish trend in the medium to long term. Therefore, one can look for a **trigger** to enter sell trades in these timeframes.
