

TA12.GK2. Part 3. Speaking + Writing 1

1.

- a. The increasing use of AI tools in healthcare has shown remarkable improvements in diagnostic accuracy.
- b. It's amazing to see how artificial intelligence can process vast amounts of data to assist doctors in making quicker decisions.

c. Indeed, AI could change the way medical professionals approach patient care in the near future.

d. Healthcare professionals are increasingly adopting these technologies to improve patient outcomes.

- A. a – b – c – d
- B. d – a – b – c
- C. a – c – b – d
- D. b – a – c – d

2.

a. The rapid development of AI in the job market is creating both opportunities and challenges for workers.

b. It has prompted debates about the potential for job displacement in industries that rely heavily on automation.

c. While AI brings significant advantages in productivity, the consequences for employment are still uncertain.

d. As AI technologies continue to advance, companies are investing heavily in automation to streamline their operations.

- A. c – b – d – a
- B. a – b – c – d
- C. d – a – b – c
- D. a – d – b – c

3.

a. The rise of artificial intelligence is already changing the landscape of online content creation.

b. AI tools can automatically generate articles, graphics, and videos in a fraction of the time it would take humans.

c. As a result, AI is not only streamlining workflows but also raising questions about the future of creative professions.

d. In the media world, the impact of AI on creativity and journalism is being closely watched.

- A. a – b – c – d
- B. d – b – c – a
- C. a – d – b – c
- D. b – a – d – c

4.

a. The impact of social media on society has sparked a global debate, especially regarding mental health.

b. While some argue that social media brings people together, others highlight its negative influence on individuals' self-esteem.

c. Many experts are calling for more regulation of these platforms to protect users from harmful content.

d. Social media platforms can promote valuable connections, but they can also contribute to issues like isolation and anxiety.

- A. b – d – a – c
- B. a – b – d – c
- C. d – a – c – b
- D. b – a – c – d

5.

a. The digital age has made it easier for mass media to reach a global audience at the touch of a button.

b. With the rise of the internet, people now have access to a vast range of news and entertainment at their fingertips.

c. This rapid dissemination of information has changed the way we interact with the world.

d. However, the speed at which information spreads can sometimes lead to misinformation and rumors.

- A. b – c – a – d
- B. d – a – b – c
- C. a – b – d – c
- D. a – d – b – c

6.

a. Wildlife conservation has become an urgent priority as human activities continue to threaten animal habitats.

b. To address this crisis, many organizations are working together to establish protected areas and conservation programs.

c. Protecting endangered species and maintaining biodiversity is essential for the health of our planet.

d. The increasing rate of species extinction due to deforestation, poaching, and pollution is alarming.

- A. a – b – d – c
- B. c – b – a – d
- C. a – d – b – c
- D. d – a – c – b

7.

a. Deforestation is one of the primary threats to wildlife conservation, particularly in tropical regions.

b. Trees are essential for maintaining biodiversity and providing shelter for countless species of animals.

c. Unfortunately, illegal logging and agricultural expansion are causing extensive damage to forests.

d. Conservationists are working tirelessly to protect these areas and restore damaged ecosystems.

- A. c – a – b – d
- B. b – c – a – d
- C. d – b – a – c
- D. a – b – c – d

8.

a. The advent of AI-powered robots in conservation efforts has brought new hope for protecting endangered species.

b. These robots can monitor wildlife populations, track poachers, and even plant trees in deforested areas.

c. Using artificial intelligence in this context is revolutionizing how we approach wildlife conservation.

d. As technology advances, AI is becoming an indispensable tool in our efforts to preserve the planet's biodiversity.

A. a – b – c – d B. d – a – b – c C. c – a – b – d D. b – c – a – d

9.

- a. Wildlife documentaries have become a powerful tool in raising awareness about conservation issues.
- b. These films often depict the beauty of nature while showing the challenges that endangered species face.
- c. They inspire people around the world to take action and support wildlife conservation efforts.
- d. However, the way they portray animals and ecosystems can sometimes be overly dramatized.

A. c – b – a – d B. b – a – d – c C. a – d – c – b D. d – a – b – c

10.

- a. Artificial intelligence is increasingly being used to automate various industries, including media and journalism.
- b. AI tools can now generate articles, predict trends, and even create images and videos.
- c. However, there are concerns about the implications of AI on jobs and the quality of information being shared.
- d. As AI technology advances, the role of human journalists may change, but it remains to be seen how the industry will adapt.

A. b – d – a – c B. a – b – d – c C. c – a – b – d D. d – b – a – c
