About us

What is the COVID-19 virus?
COVID-19 is an infectious disease caused by a recently discovered type of coronavirus.

How does COVID-19 spread?
People can catch COVID-19 from a person who has the virus (when the person coughs or exhales) or by touching surfaces that have been infected and then touching their eyes, nose or mouth.

How can I protect myself from catching COVID-19?

- Wash your hands regularly.
- Maintain distance from other people.
- Avoid touching your eyes, nose or mouth.
- Cover your mouth with your elbow or a tissue when you sneeze or cough.
- Stay at home

When should I wear an approved COVID-19 mask?
You should wear an approved COVID-19 mask especially when you have the COVID-19 symptoms.

What is the source of COVID-19?
It is possible that the source of COVID-19 be an animal, but this is not confirmed.

When was the virus that causes COVID-19 discovered?
This is a new variety of coronavirus discovered in a laboratory in Wuhan, China, in December 2019.

Who does COVID-19 affect the most?
Older people or people with a pre-existing medical condition (heart disease, cancer, etc.) appear to be more at risk than children or young adults. About one in every five people who catch COVID-19 need hospital care.
