

RECYCLING
Research Paper

General Instructions: Log in to your campus. Find the Recycling PowerPoint presentation. Read it and complete the following activities.

SERIES I – Answer the following question. Draw and color the symbol. (10 pts.)

SERIES II - Write a list of things that can be recycled in school. Sort them out in the corresponding trash can. (30 pts.)

SERIES III - Answer the following questions. (5 pts each)

1. Where does recycling go next?

2. How do you recycle at home and school?

3. Why is recycling important?

SERIES IV - How are materials recycled. Match the trash with the corresponding recycled process. (10 pts each.)

Glass

- It is washed, mixed, rolled, and dried to create new paper or cardboard products like newspapers.

Plastic and metal

- It turned into compost, serving as a natural fertilizer for plants and gardens.

Paper

- It is sorted by color, crushed, melted, and reformed into liquid glass for reuse.

Food

- These are shredded into strips, melted, and transformed into new items.

SERIES VI – Write **one problem** you can encounter when it comes to recycling. (5 pts.)
