

COLEGIO BRITÁNICO INTERNACIONAL					
Group	:	7th grade "A"	Academic Year	:	2024 - 2025
Teacher	:	Ing. Diana Vaca	Date	:	21 – 03 - 2025
Student's Name	:		Total	:	____ / 10

- What is matter made of according to the corpuscular theory?
 - Large continuous blocks
 - Small particles that move constantly
 - Invisible waves
- Which of the following is NOT a property of matter?
 - Has mass
 - Occupies space
 - Can disappear completely
 - Is made of tiny particles
- Which state of matter has a fixed shape and volume?
 - Gas
 - Liquid
 - Solid
 - Plasma
- In which state of matter do particles move the fastest?
 - Solid
 - Liquid
 - Gas
- What is the change from a solid to a gas called?
 - Sublimation
 - Evaporation
 - Condensation
 - Deposition
- What process occurs when water vapor turns into liquid water?
 - Freezing
 - Condensation
 - Evaporation
 - Fusion
- What is the name of the process when a liquid turns into a solid?
 - Melting
 - Condensation
 - Freezing (Solidification)
 - Evaporation
- What is a progressive change in the states of matter?
 - A change that moves towards a lower energy state
 - A change where matter gains energy
 - A process that does not involve energy transfer
 - A change that only happens in gases
- What is the center of an atom called?
 - Electron cloud
 - Nucleus
 - Proton zone
 - Atomic shell
- What type of charge do protons have?
 - Negative
 - Neutral
 - Positive
 - No charge
- Which subatomic particle has no charge?
 - Proton
 - Electron
 - Neutron
 - Atom
- Which scientist proposed that atoms are indivisible spheres?
 - Dalton
 - Thomson
 - Rutherford
 - Bohr
- What did Thomson's atomic model introduce?
 - The idea of electrons inside an atom
 - The concept of the nucleus
 - The idea that atoms cannot be divided
 - The concept of electron orbits
- What does the atomic number tell us?
 - The number of protons
 - The number of electrons and neutrons
 - The total weight of the atom
 - The size of the atom

15. What is the first element in the periodic table?

- a) Oxygen
- b) Hydrogen
- c) Helium
- d) Carbon

16. Which element has the atomic number 8?

- a) Oxygen
- b) Nitrogen
- c) Carbon
- d) Neon

17. What do elements in the same column (family) of the periodic table have in common?

- a) The same atomic mass
- b) The same number of protons
- c) Similar chemical properties
- d) The same number of electrons in total

18. Which of the following is NOT in the first 20 elements?

- a) Neon
- b) Gold
- c) Calcium
- d) Sodium

19. What is the largest source of water on Earth?

- a) Rivers
- b) Oceans
- c) Lakes
- d) Underground water

20. Why is most of Earth's water not drinkable?

- a) It is frozen
- b) It is polluted
- c) It is salty
- d) It is underground

21. Which of these is NOT a common use of water?

- a) Drinking
- b) Cooking
- c) Making metal
- d) Irrigation

22. What percentage of Earth's water is freshwater?

- a) 97%
- b) 3%
- c) 50%
- d) 10%

23. Which of the following is an example of groundwater?

- a) Rainwater
- b) A lake
- c) An aquifer
- d) A river

24. Which human activity consumes the most water globally?

- a) Industry
- b) Drinking
- c) Recreation

25. Why is water conservation important?

- a) To reduce pollution
- b) To ensure there is enough water for future generations
- c) To lower ocean levels
- d) To increase water availability in space

26. What is one way people can conserve water at home?

- a) Taking longer showers
- b) Fixing leaks
- c) Leaving taps running
- d) Watering plants during the hottest part of the day

27. What is the name of the process where water evaporates, condenses, and falls as precipitation?

- a) The water system
- b) The water cycle
- c) The condensation process
- d) The evaporation cycle
