Opening Gap + Void (ICT) Indicator for MetaTrader 4 Download - Free

The **Opening Gap + Void Indicator** in **MetaTrader 4 indicators** is one of the essential tools for identifying **price differences at market open** between two trading sessions. A **gap** occurs when the **opening price** of a new candlestick is **higher or lower** than the **closing price** of the previous candlestick.

This indicator **automatically detects price gaps and displays them on the chart**. Additionally, if an of these gaps are filled by the price, **the indicator removes those areas from the chart and clearly highlights the remaining empty space**.

Opening Gap + Void Indicator in an Uptrend

In the **1-hour chart of the EUR/USD currency pair**, after the formation of a **gap**, the price has increased. These **gaps act as support levels** and, with a shift in market direction, **prevent further price decline**.

LIVEWORKSHEETS

Opening Gap + Void Indicator in a Downtrend

Gaps **identified by the Opening Gap indicator** act as **resistance levels (Resistance)** and typically trigger a **price reaction and decline**. In these areas, **the price tends to correct or drop after reaching the specified level**.

The **price chart below** represents the **USD/CAD currency pair on a 15-minute timeframe**, showing that **after reaching the resistance gap level, the price reacted and entered a downtrend**.
