## Our possessions

<sup>1</sup> Huang Qingjun is a photographer who travels around China and takes photos of people that are standing outside their homes with their household possessions. Huang started taking photos when he was a teenager and then worked for the magazine *Chinese National Geography*. In 2006 he began this project.

<sup>2</sup> The photos show the huge changes which are taking place in China. For example, the photo of elderly farmers who are standing outside their house shows a satellite dish, a DVD player and a phone. Huang's photos are a simple idea that shows how people's lives are changing.

<sup>3</sup> At first, some people feel it is strange to take all the things which are in their house outside for a photograph, but they mostly say yes when they understand why.

<sup>4</sup> It is easier to take the photos in places where people don't have many possessions. Some photographs take him a couple of days and others several months. He visited one location where a couple had to move because of plans to build tower blocks and offices. In the photo, the couple are sitting on their bed and you can see the Chinese word which means 'destroy' on the wall behind them. But the couple are happy because they got money for moving.
