

FVG Indicator for MetaTrader 4 Download - Free [TradingFinder]

Traders use various tools and trading styles to identify investment opportunities. One of the powerful and practical tools that assist traders in this path is the **Fair Value Gap (FVG)** indicator in **MetaTrader 4**.

A **Fair Value Gap (FVG)** refers to a gap in the price structure where the market has failed to establish a balance between **Supply** and **Demand**.

FVGs form when a sharp price movement occurs. Simply put, after the formation of three **candlesticks**, the gap between the first and the third candlestick is called the "FVG."

This tool is a **MT4 liquidity indicator** and part of smart money strategies

Indicator Specifications Table

Category	ICT - Liquidity - Smart Money
Platform	Meta Trader 4
Skill Level	Average
Indicator Type	Reversal - Continuation
Time Frame	Multi time frame
Trading Style	Intraday Trading
Market	All Markets

Uptrend Conditions

According to the Binance Coin (**BNB**) price chart on the 1-hour timeframe, in an uptrend condition, the price returns to the Fair Value Gap (**FVG**) area each time it forms, and the **uptrend** resumes.

Each time the trend returns to these areas, it presents an excellent opportunity to **enter** a **long** trade position.

Uptrend Conditions in Fair Value Gap (FVG) Indicator

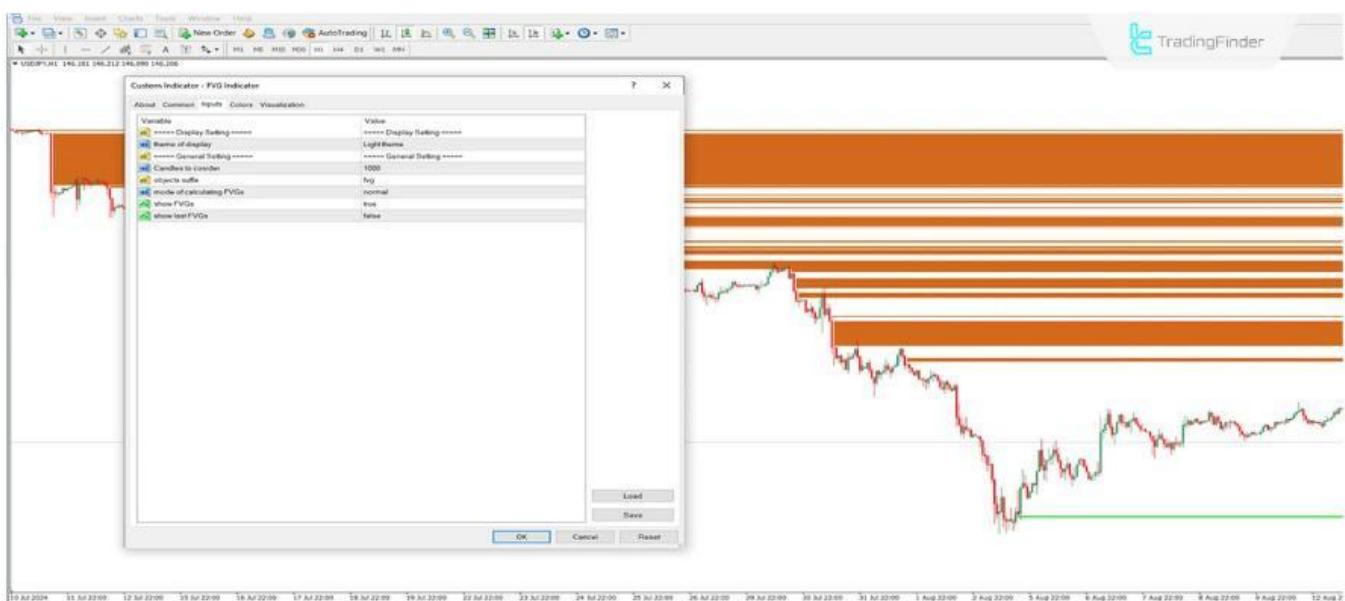

Downtrend Conditions

The **USD/CAD** currency pair price chart in the **30-minute** timeframe shows how this indicator works in a downtrend. According to the image, after a price correction, the trend returns to the **FVG** formed by the **Fair Value Gap** indicator and then continues its previous trend. The points where the **candlesticks** meet these areas are good opportunities to enter short trades.

Settings

Settings of the Fair Value Gap (FVG) Indicator

- ↳ **Theme of display:** Change the indicator's background to dark and light modes;
- ↳ **Candles to consider:** The number of candles to consider for calculating FVGs is 1000;
- ↳ **Objects suffix:** Set a suffix for the boxes created by the indicator;
- ↳ **Mode of calculating FVGs:** Choose how FVGs are calculated by the indicator;
- ↳ **Show FVGs:** Enable or disable the display of FVG boxes on the chart;
- ↳ **Show last FVGs:** When enabled, only the last FVGs are displayed.

Conclusion

The Fair Value Gap (**FVG**) indicator is a highly practical tool for identifying optimal entry and exit points and determining **support** and **resistance**.

This **MT4 ICT indicator** is more suitable for traders with a deep understanding of liquidity and **supply** & **demand**. It is a precise tool that **automatically** identifies and draws market imbalance points.
