

TA7. U10. Energy Sources. Reading 4

Choose the word (A, B, C, or D) that best fits the blank space in the following passage.

The Importance of Renewable Energy

Energy is essential for our daily lives, and it is important to use it efficiently. There are many sources of energy, but some are _____ and can cause environmental harm. For instance, coal and oil are _____ sources, meaning they _____ from the Earth's finite resources and will eventually _____ of supply. This makes it essential to find alternatives, such as _____ energy sources like solar energy and wind energy.

Solar panels are an effective way to _____ electricity from the sun's energy. This form of energy is _____ in many parts of the world and is clean, meaning it does not _____ the environment. Similarly, wind energy is harnessed through wind turbines, and it also has minimal impact on the planet.

In addition to these, hydro energy is another form of renewable energy that _____ power using the force of water. Although hydro energy is highly efficient, it is not always _____ in all regions.

It is essential to _____ our reliance on non-renewable sources and _____ them with sustainable alternatives. The use of energy-efficient light bulbs and electrical appliances can also help _____ energy. By making these changes, we can _____ the environment and ensure a cleaner, safer planet for future generations.

1. A. limited	B. available	C. renewable	D. non-renewable
2. A. renewable	B. non-renewable	C. dangerous	D. clean
3. A. come from	B. run out of	C. produce	D. protect
4. A. save	B. become available	C. pollute	D. run out of
5. A. renewable	B. non-renewable	C. expensive	D. clean
6. A. reduce	B. produce	C. protect	D. reduce
7. A. renewable	B. limited	C. available	D. non-renewable
8. A. reduce	B. pollute	C. provide	D. protect
9. A. produce	B. pollute	C. save	D. turn off
10. A. save	B. provide	C. overheat	D. protect
