

TA7. U11. Travelling in the future. Reading 3

Text 1: The Future of Travel

In the future, the way we travel will (1) _____ significantly. One of the most exciting innovations is the driverless car. These cars will be able to drive themselves using an autopilot (2) _____. This will make traveling much safer and more convenient. Instead of focusing on the road, passengers can relax, sleep, or even work during their journey. Another fascinating development is the hyperloop (3) _____, which is a high-speed transportation system that can travel at speeds of up to 700 miles per hour. This will make long-distance travel incredibly fast and efficient.

For those looking for eco-friendly options, there will be solar-powered ships (4) _____ that can sail across oceans without polluting the environment. These ships will be powered by solar energy, reducing harmful emissions and making travel more sustainable.

One of the most fun and futuristic modes of travel will be the bamboo-copter (5) _____. This personal flying device will allow people to soar through the sky, avoiding traffic and traveling faster than ever before.

- | | | | |
|----------------------|---------------|------------------|------------------|
| 1. a) appear | b) disappear | c) run on | d) change |
| 2. a) function | b) pedal | c) model | d) feature |
| 3. a) mode of travel | b) rails | c) ship | d) vehicle |
| 4. a) comfortable | b) convenient | c) economical | d) solar-powered |
| 5. a) bamboo-copter | b) autopilot | c) teleportation | d) flying car |

Text 2: Future Transportation Features

As the world becomes more advanced, we will see many new modes of travel (6) _____. One of the most exciting changes will be the rise of driverless (7) _____. These vehicles will use autopilot technology to navigate, allowing passengers to relax during their journey.

Electric cars (8) _____ will be more popular, as they are both economical and eco-friendly. These vehicles run on electricity instead of gasoline, which helps reduce air pollution. Additionally, they are much quieter than traditional cars, making the ride more comfortable.

In the future, we might even see teleporters (9) _____. This technology will allow people to instantly travel to distant locations without the need for traditional vehicles. While this idea may seem like science fiction, it is becoming more realistic as technology advances. Lastly, solar-powered ships (10) _____ will revolutionize maritime travel. These ships will be able to sail across oceans using only the energy from the sun, making them not only economical but also environmentally friendly.

- | | | | |
|----------------------|------------------|---------------|------------------|
| 6. a) inconvenient | b) solar-powered | c) dangerous | d) familiar |
| 7. a) solar-powered | b) eco-friendly | c) driverless | d) convenient |
| 8. a) petrol-powered | b) electric | c) bicycle | d) solar-powered |

9. a) teleporter

b) bamboo-copter

c) flying car

d) train

10. a) motorbike

b) solar-powered ship

c) spaceship

d) electric scooter
