

TA10. U9. Protecting the environment. Reading 3

Text 1: Protecting the Environment

Protecting the environment is essential for the health of our planet and the survival of countless species. One of the most important aspects of environmental protection is maintaining a (1) ____ between human activities and nature. Deforestation, for example, causes severe damage to ecosystems and (2) ____ loss, threatening species like the (3) ____ panda. The destruction of forests leads to the (4) ____ of their habitats, pushing many animals to become endangered. It is crucial to (5) ____ more practical solutions to address these issues. We need to (6) ____ awareness about the impact of human activities such as illegal wildlife trade and pollution. These activities contribute to (7) ____ change, which brings (8) ____ consequences, including rising sea levels and extreme weather conditions. Individuals can make a difference by taking small steps, like reducing waste and supporting conservation efforts.

1. a) balance	b) impact	c) atmosphere	d) biodiversity
2. a) ecosystem	b) forest	c) biodiversity	d) climate
3. a) tortoise	b) gorilla	c) whale	d) panda
4. a) restoration	b) loss	c) development	d) extinction
5. a) avoid	b) cut down	c) organize	d) ignore
6. a) increase	b) identify	c) recycle	d) protect
7. a) wildlife	b) deforestation	c) climate	d) environmental
8. a) serious	b) minor	c) temporary	d) positive

Text 2: Climate Change and Its Effects

Climate change is a global (1) ____ that requires immediate attention. As a result of human activities such as (2) ____ forests and burning fossil fuels, our planet is experiencing increasingly severe weather patterns, including heatwaves and (3) ____ ice melting. These changes are causing unpredictable (4) ____ and are affecting ecosystems worldwide. Many species, like the (5) ____ gorilla, are facing the threat of extinction as their habitats are destroyed. In addition, rising temperatures have led to (6) ____ air quality, making it harder for people to breathe. Addressing climate change requires collective action, with everyone taking responsibility for their actions. Governments, businesses, and individuals need to work together to (7) ____ waste, reduce carbon emissions, and protect natural habitats. A healthier, more balanced environment will be better for both humans and wildlife.

1. a) trade	b) issue	c) solution	d) biodiversity
2. a) cutting down	b) protecting	c) recycling	d) supporting
3. a) snow	b) gas	c) water	d) ice
4. a) balance	b) respiratory	c) habits	d) consequences
5. a) elephant	b) panda	c) gorilla	d) tortoise
6. a) improved	b) good	c) harmful	d) relaxed
7. a) increase	b) reduce	c) ignore	d) avoid
