Stages in the Human Life Cycle

INSTRUCTIONS: Write the following notes in your Social Subjects notebook.

There are six stages in the human life cycle

- **Foetus / Pregnancy / Prenatal** – from 0 – 9 months; this is when a fertilized egg is in the mother's womb.
- **Infancy / Baby** – from birth to 1 year
- **Childhood**
  - **Toddler**: 1 -2 years
  - **Pre-schooler:** 3-5 years
  - **Primary Schooler:** 6-12 years
- **Adolescent / Teenage:** 13 - 19 years
- **Adulthood**
  - **Young Adult**: 20 – 35 years
  - **Middle Aged Adult:** 36 – 55 years
  - **Older Adult**: 55 – 65 years
- **Elderly / Old Age** – 65 years and up
