

You've Got Mail!

e-mail = electronic mail

examples: gmail, Hotmail, AOL, yahoo

An email address is like a street address.

A street address tells how to find a person's home.

An email address tells how to find a person online (on the internet.)

How do you say or read an e-mail address? Watch and learn!

https://youtu.be/yJA-FX00AkY?si=y4DROKB_-KKbetin

Read and record.

jackandjill@hotmail.com

13579@yahoo.com

friendlyphotographers@outlook.com

Listen and write.

Parts of an Email Address

The 2 main parts of an email address are the username and domain.

name@company.com

username

domain

The **username** is the person or group you send your email to.

The **domain** is where you can find that person on the internet.

Name the 2 parts of an email address. 1) _____ 2) _____

Part one tells you _____

Part 2 tells you _____

What is the symbol connects the 2 parts? ____

The domain has 2 parts.

The first part tells the business or group.

The second part tells the type of business or group

john.smith@apple.com

username business name type of business

.com = business that wants to make money

.org = helping group that does not make money

.gov = government group

.edu = school group

What type of business is each group? Describe them!

nike.com is a _____

wingate.edu is a _____

amazon.com is a _____

redcross.org is a _____

ssa.gov is a _____

unitedway.org is a _____

Watch and listen.

How do you say the other symbols in email addresses?
