Overview of the Indicator

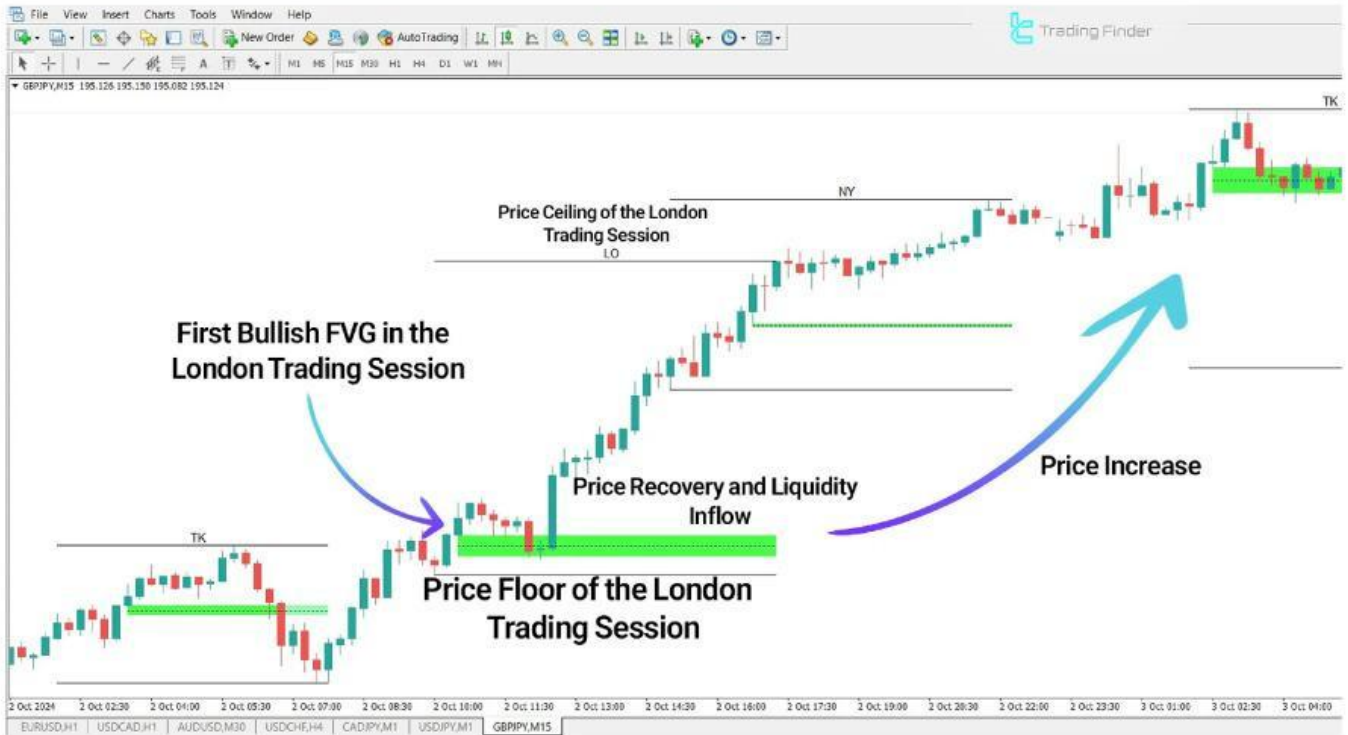

The **FVG Session Intraday Indicator**, as one of the **key tools in the ICT trading style**, plays a **crucial role** in **identifying and analyzing Fair Value Gap (FVG) zones**.

This indicator **automatically plots FVG areas**, and if these zones are **broken by price in the opposite direction**, it **fades them out**, signaling to traders that these levels have lost their significance.

Indicator in Uptrend

In the image below, the **price chart of the GBP/JPY currency pair** in a **15-minute timeframe** is displayed. The indicator has identified a **bullish Fair Value Gap (FVG) zone** during the **London trading session**, and the price has **retraced to this area** to **absorb liquidity**.

After liquidity is collected, **traders enter buy (Buy) positions**, placing their **stop losses ahead of these zones** to manage risk effectively.

Indicator in Downtrend

The **price chart of the USD/JPY currency pair in a 5-minute timeframe** is displayed. After forming a **bearish Fair Value Gap (FVG)**, the price **retraces to this zone to trigger orders and absorb liquidity**. After **testing this area**, the price **continues its downward trend**, confirming the strength of the bearish momentum.
