

## Turtle Soup Indicator in ICT Style for MetaTrader 4

### Download - Free - [TFlab]

The **Turtle Soup Indicator** for MetaTrader 4 is one of the trading patterns used in the **ICT style**. This indicator can detect **fake price breakouts (Fake Breakouts)**, and if the price conditions are suitable, it provides a signal to enter a trade in the opposite direction of the trend.

Therefore, Turtle Soup is ideal for **reversal trades**. This **MT4 liquidity indicator** is simple in appearance and divides fake breakouts into **Internal** and **External** categories.

Additionally, new highs are labeled with "HH" and new lows with "LL." Green lines are drawn by connecting these highs and lows. These green lines function similarly to a **ZigZag** pattern.

## Indicator Specifications Table

<b>Category</b>	ICT - Predictive Signal - Liquidity
<b>Platform</b>	MetaTrader 4
<b>Skill Level</b>	Intermediate
<b>Indicator Type</b>	Reversal - Range
<b>Timeframe</b>	Multi timeframe
<b>Trading Style</b>	Scalping - Day Trading - Swing Trading
<b>Market</b>	Cryptocurrency - Forex - Commodities - Stocks

## Turtle Soup Indicator in an Uptrend

According to the price chart of **USD/CAD** in the **1-hour**, the price has broken below the support level. Turtle Soup identifies this breakout and signals a **buy** trade with a **green arrow**.

If the price rises above the support level, it indicates an opportunity to enter a **long position**, as the breakout is fake, and the price is likely to reverse upward.

Performance of the Turtle Soup Indicator on the USD/CHF 15-Minute Chart

## Turtle Soup Indicator in a Downtrend

According to the price chart of **Binance** Coin in the **4-hour** timeframe, the price has broken above the resistance level. The Turtle Soup pattern detects this breakout and signals a **sell** trade with a **green arrow**.
