

Hollywood

Open Up 6 * Unit 5

Hollywood was a small town in the past, but now it is one of the most popular cities because of the film industry. People started to make films in this city because the weather was good. It was sunny, so the light was good for filming.

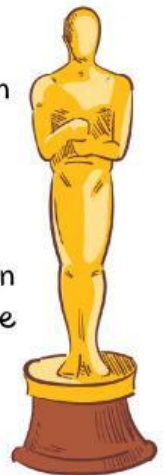

The first films were black and white, and there wasn't any sound or talking in them.

Later, in 1930s, the film makers started to use sound. Walt Disney made his first film in colour in 1937, and it was Snow White.

There are lots of tourists visiting the city every year. They usually walk along the 'Walk of Fame' to see the stars showing famous people's names. There are more than 2600 stars!

They can also take a bus tour to see where the famous film stars live and they can visit the Studios to see how they make films.

The Academy Awards, or Oscars, take place in Hollywood every year. This is an important evening for people who work in film. Crowds of people come to see the most popular actors and actresses in the world on the red carpet.
