A08

LISTENING QUIZ 1 PRACTICE

by Julian Conde

I. Listen.

II. Choose the best answer.

1. How is nuclear energy produced in power plants?

a) By burning coal and oil
b) Through nuclear fission (splitting atoms)
c) Using wind turbines

2. What is one major advantage of nuclear energy?

a) It produces a lot of greenhouse gases
b) It is very inefficient
c) It doesn't release greenhouse gases

3. What was a problem in Chernobyl and Fukushima?

a) They ran out of fuel
b) There were nuclear accidents
c) They produced too much wind energy

4. Why is nuclear waste dangerous?

a) It smells bad
b) It is radioactive and must be stored safely for thousands of years
c) It explodes easily

5. Why do some scientists support nuclear energy for the future?

a) Because it is always cheap and risk-free
b) Because it doesn't produce any waste
c) Because it can help reduce climate change and new reactors may be safer
