## Trend Lord NRP Indicator in MT4 Download - Free - [Tradingfinder]

The **Trend Lord NRP Indicator** functions like a **Moving Average (MA)** and consists of colored histograms that change in color and size. These histograms generate signals for entering **buy** and **sell** trades.

The price position relative to the **"Trend Lord NRP"** determines whether the trend is **bullish** or **bearish**. This trading tool is also part of the **MetaTrader 4 currency strength indicators** category.

Specifications of the Trend Lord NRP Indicator

Some of the practical specifications and features of the **NRP Trend Predictor** indicator can be seen in the table below; **reviewing the specifications of the NRP Trend Predictor indicator**:

Category	Signals & Forecasts - Currency Strength- Trading Tool
Platform	MetaTrader 4
Skill Level	Beginner
Indicator Type	Continuation - Reversal - Breakout
Timeframe	30 minutes - 1 hour - 4 hours - Daily - Weekly
Trading Style	Intraday – Medium term
Market	Cryptocurrencies - Stocks - Forex - Commodities

Bullish Trend Analysis

In the **Bitcoin (BTC)** price chart on a **1-hour timeframe**, the price moves from below the indicator to above, effectively breaking **upward**.

In this case, the **Elements** turn **light blue**, indicating the start of a **bullish trend**. As shown in the image, the size of the histograms highlights the trend's **strength**.

Entry signal generation in a bullish trend

Bearish Trend Analysis

Contrary to a bullish trend, the **AUD/USD** currency pair chart on a **1-hour timeframe** showcases a sell signal in a **bearish trend**.
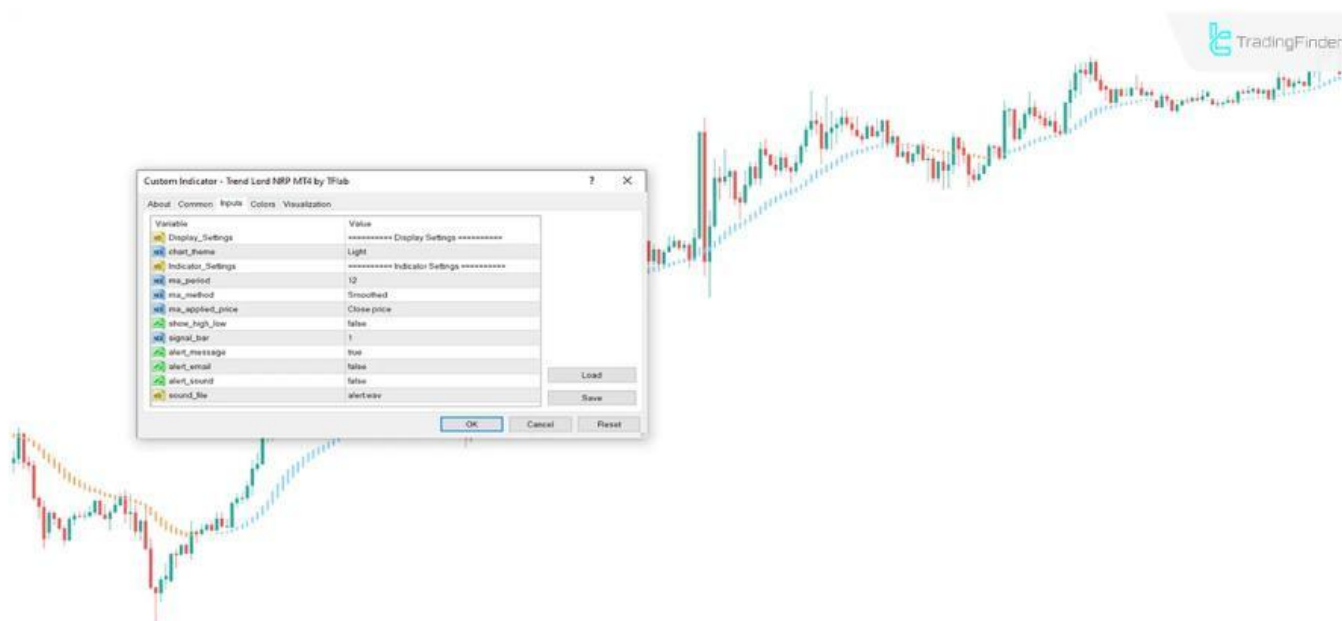

Here, the price breaks downward through the histograms, turning **light brown**. The bearish trend **continues** as long as the price remains below the **Elements**.

Entry signal generation in a bearish trend
