ZP Day Trading Indicator in MT4 Download - Free - [TradingFinder]

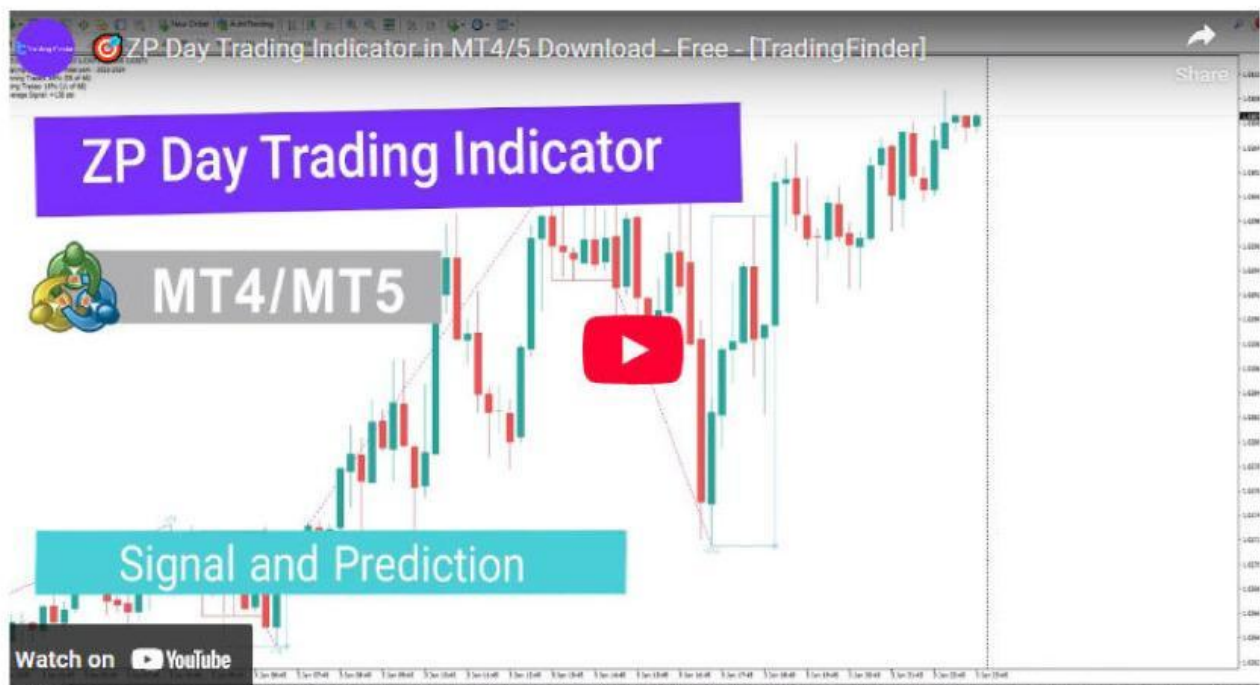

The **ZP Day Trading** Indicator identifies price **range zones** and displays them using **colored boxes** on the chart. Price fluctuations within a defined area, between a **support** and **resistance** zone, form the **trading range** zone.

This **MT4 signal and prediction indicator** is developed based on the **Price Action** trading style and, besides marking the zones, provides **entry signals** for trades.

ZP Day Trading Indicator Specifications

The table below provides an overview of the main specifications of the indicator:

Category	Signal and Prediction - Price Action - Trading Cycles
Platform	MetaTrader 4
Skill Level	Beginner
Indicator Type	Reversal - Range - Breakout
Time Frame	Multi-time frame
Trading Style	Scalping - Day Trading - Swing Trading
Market	All Markets

Buy Signal in an Uptrend

When the price breaks above the range zone, the **indicator highlights** the area with a **blue box** and generates a **buy signal** with a light **blue arrow**.
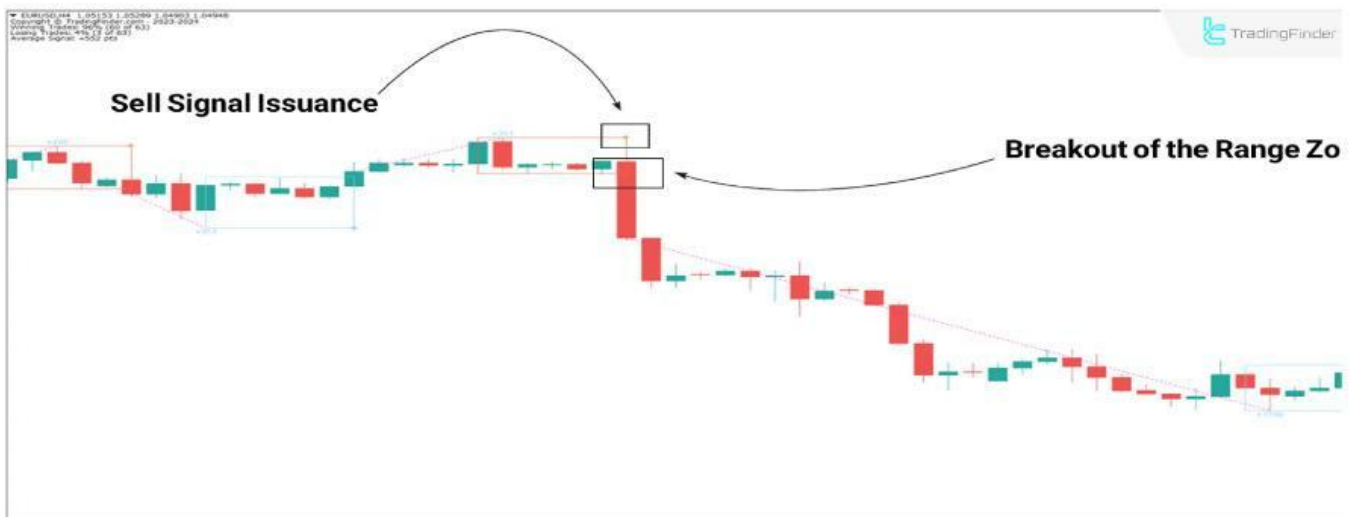

The chart of the **GBP/USD** currency pair on a **1-hour timeframe** demonstrates the indicator's functionality during an **uptrend**.
