

Gartley Harmonic Pattern Indicator on TradingView - Free - [TradingFinder]

The **Gartley Harmonic Pattern indicator** in [TradingView indicators](#) identifies **Gartley patterns** and uses **Fibonacci levels** to predict **Potential Reversal Zones (PRZ)** in the market.

This pattern usually forms in the **first and second waves** of the **Elliott Wave Theory**, where the **XA** wave represents **Wave 1**, and the **ABCD correction** represents **Wave 2**. The **key points** of the Gartley pattern align with **Fibonacci levels**.

Indicator in an Uptrend

The movement from **Point X to A** must first be **upward** to identify an **upward Gartley pattern**. Then, the movement from **Point A to B** occurs **downward**, followed by an **upward movement** from **Point B to C**.

Finally, the movement from point **C to D** forms a **downward move**. This pattern appears similar to the letter **M** on the chart. After completing this pattern, the price usually starts **rising** from point **D**, and then **this Harmonic Pattern indicator** displays the **entry signal (green arrow)** for the trade.

Indicator in a Downtrend

In a **downtrend** for **GBP/JPY**, the initial movement from **Point X to A** is **downward**; the movement from **Point A to B** occurs **upward**. Afterward, the movement from **Point B to C** is **downward** again, and finally, the movement from **Point C to D** ascends.

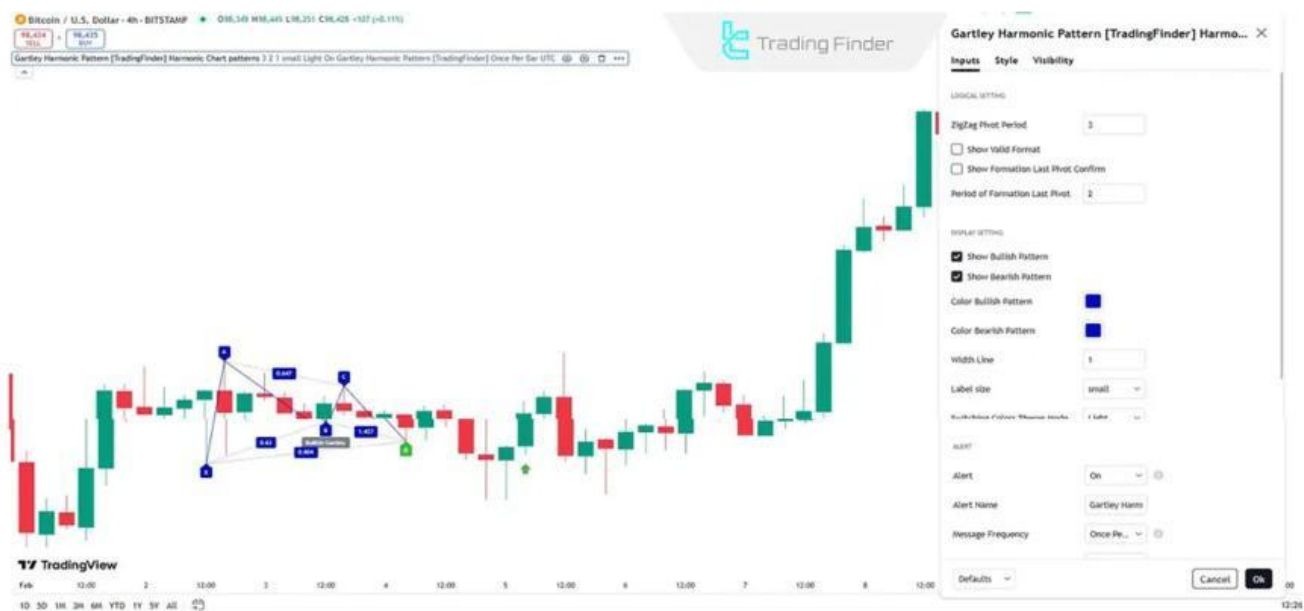

Ultimately, the **bearish Gartley pattern** on the chart resembles the **letter "W,"** indicating a **potential price drop** from Point D after the final movement.
