

Label each process to complete the diagram of the water cycle:

Evaporation

Collection

Precipitation

Condensation

Choose the correct answer:

- 1- The energy that powers the water cycle comes from .....(the Earth – the Sun – the Moon)
- 2- When water evaporates, it changes from liquid water into.....(clouds-snow-water vapor)
- 3- The wind blows. The clouds get heavy and cool. Water falls from the clouds. This is called ..... (condensation – evaporation – precipitation)
- 4- Gas changes into puffy clouds, this is ..... (condensation – evaporation – precipitation)
