

# STUDENT WORKSHEET

Global warming

Members of the group

## Stimulation

Please click on the barcode below!

## Problem Statement

Based on the information contained in the barcode, write down any problems that arise from this information!

## Data Collection

To answer these problems, please answer the questions below!

1. In your opinion, what is global warming?

**2. What are the causes of global warming?**

**3. What impact does global warming have on human, animal and plant life?**

**4. According to experts, Jakarta is predicted to sink in 2050. The main researcher of the National Research and Innovation Agency (BRIN), in his seminar, presented the results of a simulation of sea level rise and its impact on Jakarta, which is 160.4 km<sup>2</sup> (24.3%). Based on this statement, do you agree that global warming is one of the factors causing Jakarta to sink? Explain your reasons!**

5. As active and creative students, what efforts can you make to reduce global warming?

Please design the poster that you will make to prevent global warming! Fill the poster with information that supports global warming and prevention efforts!
